CITY IMPROVEMENT TRUST BOARD, MYSORE

MYSORE

Dated 16th January *194* 3

Report to accompany the estimate for laying 7" sub-mains (East to West) in Yakargeri, Chamaraja Mohalla

---

There are main sewer lines running North to South Connections for these mains from the houses situated to North of Mahadeswara Temple are not possible as the independent connections from the several houses to these mains will be long and very costly Hence it is -- better to run a sub-main from East to West connecting with the main sewer so that short connections may be given independently from each house The estimate is accordingly cast for laying the sub-mains Total length of the sub-main A B will be 350' with two manholes -- (2 & 3) and the sub-main C D will be 200 feet with one manhole @ 1

Other necessary works are also included in the estimate The estimate amounts to Rs 1,600/- The estimate has to be sanctioned - early as the area is reported to be very fitting for want of the -- underground connections
